

### GObp in module 1.67

Term

negative regulation of viral genome replication  
RNA splicing, via transesterification reactions  
mRNA splicing, via spliceosome  
negative regulation of translation  
epithelial to mesenchymal transition  
covalent chromatin modification

### GOcc in module 1.67

Term

mRNA 3'-UTR AU-rich region binding  
transcription coactivator activity  
RNA binding

### GOfmf in module 1.67

Term

U2 snRNP  
U2-type precatalytic spliceosome  
RNA polymerase II transcription regulator complex  
nuclear speck  
ribonucleoprotein complex
