

Decreased error with age (BP)

Term

B cell receptor signaling pathway
regulation of B cell differentiation
regulation of lymphocyte apoptotic process
positive regulation of B cell activation
sister chromatid cohesion
regulation of B cell proliferation
Fc-gamma receptor signaling pathway involved in phagocytosis
response to gamma radiation
regulation of Rho protein signal transduction
negative regulation of ERK1 and ERK2 cascade
regulation of toll-like receptor signaling pathway
T cell differentiation
neutrophil degranulation
regulation of catalytic activity

0 1 2 3
log2Enrichment

Decreased error with age (MF)

Term

Rho guanyl-nucleotide exchange factor activity
GTPase regulator activity

0 1 2 3
log2Enrichment
