

# Decreased error with age (I)

Term

cytokinetic process  
regulation of cardiac conduction  
mitotic metaphase plate congression  
sister chromatid cohesion  
response to gamma radiation  
negative regulation of peptidyl-tyrosine phosphorylation  
regulation of Rho protein signal transduction  
regulation of phosphoprotein phosphatase activity  
receptor signaling pathway via JAK-STAT  
regulation of small GTPase mediated signal transduction  
sensory perception of mechanical stimulus

# Decreased error with age (I)

Term

coreceptor activity  
Rho guanyl-nucleotide exchange factor activity

# Decreased error with age (C)

Term

multivesicular body  
condensed chromosome kinetochore  
ciliary basal body
